

My name is Aadil Khan, I am a design geek with a specialization in website design and branding. I have a very unique style with a focus on small details – A distinct style that emphasizes minor details. I have an obsession with perfection, and I invest my time to perfect my designs according to the requirements. A design that not only endures but also continues to function well decades after it was created.

I concentrate on little things and do them quite efficiently. I'm always looking for new ways to help me accomplish that 'donkey work' more efficiently; for that reason, I spend the majority of my time reading, studying, and getting my hands dirty with whatever new technology and tools are available. This assists me in keeping things structured, in fact, very organised, increasing productivity and achieving excellence in my work. I train others around me as well, keeping everyone on the same page and boosting the whole team's productivity, eventually. Moreover, I have

Proficiency in:

Html5 | Css3 | Sass | Javascript | Php | Ui/Ux | Branding | Web/App Design | Content Design | Animation

Efficiency for:

Client Dealing | Quality Assurance | Leadership | Project, Team, & Deadline Management | Much More...!

Playgrounds as:

VS Code | Cursor | Prepros | WordPress | Elementor | Figma | Illustrator | Photoshop | After Effects | GPT4

Willingness to-do:

React.js | Node.js | Firebase | React Native | Laravel | Python | Search Engine Optimisation.

General Science

HSC Shipowners College
Pre-Engineering

Aykays - Senior Graphics & Front-end Developer
2018 - 2025 (Approx. 7 years)

So, I joined Aykays as a graphic design intern over seven years ago while still in matric. What began as a part-time opportunity quickly turned into a passion, especially while working with international clients. After earning my certification in graphic design, I continued to grow within the company — expanding my role into front-end development. Over time, I progressed to senior roles in both disciplines, gaining deep hands-on experience and contributing to a wide range of creative and technical projects.
